Project Pathways completed

Project Pathways, launched in December 2008, was the formal process to further enhance the Bank's strength through efficiency initiatives, portfolio optimisation and strategic partnerships.

The project, which had the main aim of maximising shareholder value, was successfully completed in August 2009.

Efficiency program

- > Estimated annual cost savings of approximately \$50m.
- > Executed initiatives that allowed the Bank to become competitive with major banks on a cost-to-income ratio basis.
- > Organisation restructure resulted in a single management structure and shared services function to better service the Bank's unique Owner-Managed Branch™ (OMB) network.

Portfolio optimisation

- > Completed enhancements to direct channels and the OMB network to incentivise stronger growth in retail deposits.
- > Focused on increasing our share of the SME market, via enhanced product offerings and cross-sell capability.

Strategic partner

- > BOQ received interest from a number of parties, with capital raising providing competitive pricing for potential shareholders.
- > BOQ will remain an independent and credible alternative to the major banks.

highlights

'08/'09

Our focus remains on building shareholder value, and in the current economic environment it is imperative we continue to think outside the square to do this.

Strong growth

- > BOQ continued to outperform competitors in loan growth, with 88% of this growth funded through retail deposits.

Awards for excellence

- > Bank of Queensland won the 'Best Value Savings Accounts in Australia' award from CANSTAR CANNEX.
- > Managing Director David Liddy was named Australia's Financial Services Executive of the Year by Australian Banking & Finance Magazine.
- > BOQ's online banking services were recently highly rated 5 out of 6 stars by PC Authority magazine.
- > TNS Business Finance Monitor Survey ranked BOQ number 1 in business customer satisfaction.

Improved capital position

- > The retail entitlement shareholder offer raised \$111m in September 2009.
- > The institutional offer and placement raised \$230m in August 2009.
- > Raised \$108m in January 2009 through institutional placement and share purchase plan.

Even throughout the global financial crisis, the Bank's unique OMB network continued to demonstrate unmatched productivity.

We have now converted 39 corporate branches to high-yielding OMBs, where we have seen average monthly settlements increase 64% after conversion.

Financial Highlights

- > Despite adverse market conditions and reduced net interest margins, continued growth in lending and deposits combined with rigorous cost surveillance helped drive normalised cash net profit after tax 21% higher to \$187.4m.
- > Controlled approach to expense management, along with efficiencies identified by Project Pathways, resulted in normalised cash cost-to-income ratio dropping 6.2% to 49.9%.
- > Continued focus on well-secured housing and SME lending, maintained sound asset quality. Bad debts have been increasing, but are still tracking well below major bank peers.
- > In response to prevailing market conditions, BOQ adopted a prudent dividend policy, declaring a full-year dividend of 52 cents fully franked per share.

It is no exaggeration to say that the past 18 months has been an unprecedented time, not only for the Australian financial services industry, but for the global economy. Fortunately, the unique strength of our domestic banking system and the stimulus of expansionary fiscal and monetary policy have to a large degree insulated Australia from the worst of the global recession.

Notwithstanding, an inescapable consequence of the global financial crisis for Australian banks has been the severe contraction of traditional wholesale funding channels. Despite intensified demand within the marketplace for alternate funding, over the past 12 months Bank of Queensland has consolidated one of the strongest capital positions of Australian banks and sourced additional liquidity.

Another undoubted impact on the Australian financial system has been the significant increase in impaired assets for many banks. Notably, Bank of Queensland's impaired assets in the 2009

financial year were much lower than our competitors, reflecting our continued focus on well-secured housing and SME lending.

The deteriorating economy forced many Australian companies to fail in the 2009 financial year which in turn forced bad debts upwards for banks. Fortunately Bank of Queensland's position is much better than the major banks due to our lower risk profile and our traditionally low levels of corporate exposure.

Against this backdrop of challenges, the Bank's ability to increase normalised cash net profit after tax by 21% to \$187.4 million is an outstanding achievement.

Consistent with the prudent approach by the wider banking market, directors remained conscious of the over-riding need to preserve capital given prevailing market conditions and declared a reduced final dividend of 26 cents per share fully franked. This lifted the full-year dividend to 52 cents per share fully franked.

During the year under review we not only increased profitability but also, through the successful completion of Project Pathways, created a platform that will strategically drive our continued growth into the future.

Project Pathways was the formal process announced at our 2008 AGM designed to further strengthen the Bank's foundations and forward growth prospects through efficiency initiatives, portfolio optimisation, strategic partnerships and complementary mergers.

Within six months this comprehensive diagnostic review of our entire organisation had identified \$50 million in annualised cost saving opportunities. Among the key restructuring outcomes achieved through Project Pathways was the merging of our Retail and Business Financial Services channels into a single Banking

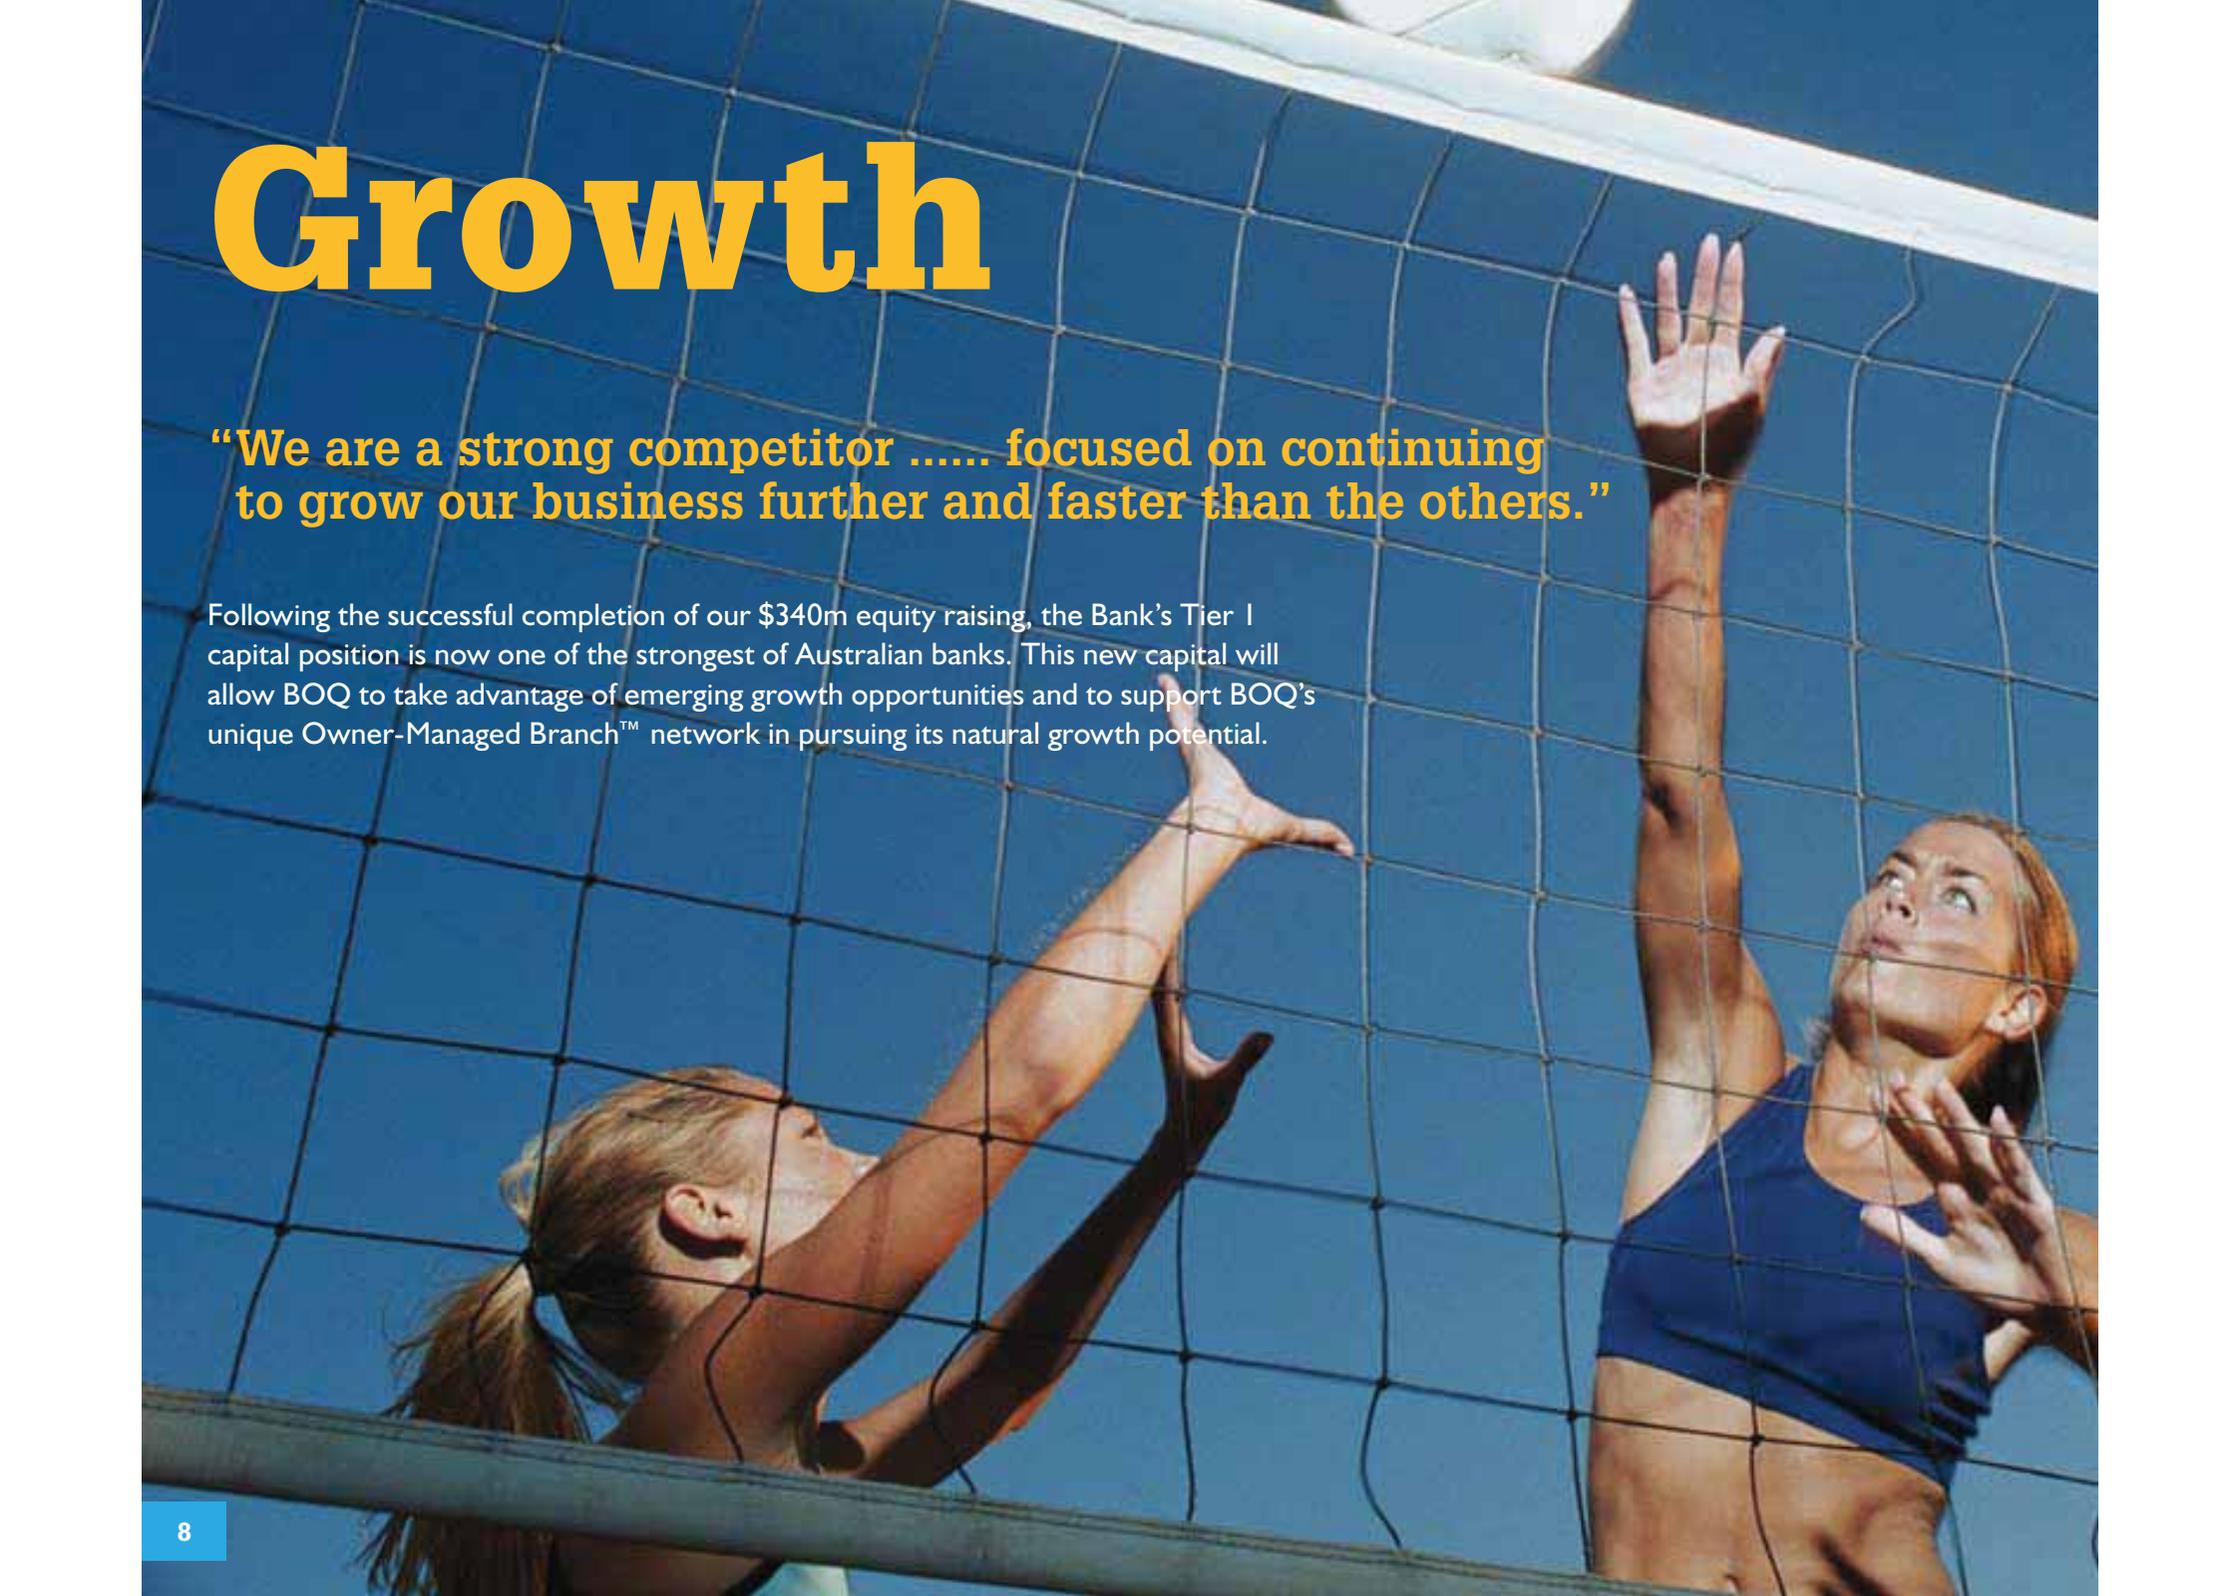

channel, that will better drive targeted growth in the retail and SME segments.

In early 2009 the Bank commenced the search for a strategic partner and received significant interest from European and Asian investors. The improved market conditions in August 2009 allowed for a successful capital raising where the potential strategic partners competed for BOQ stock.

The Bank received tremendous support from shareholders for the 1-for-9 pro-rata non-renounceable Entitlement Offer which was successfully completed in September 2009. The retail component raised \$111 million and followed the completion of an institutional component and placement which raised approximately \$230 million.

Our institutional shareholders subscribed for approximately 93% of their entitlements. This exceptional show of support by our institutional shareholders is an endorsement of the Bank's business model and strategic growth blueprint.

Growth

“We are a strong competitor focused on continuing to grow our business further and faster than the others.”

Following the successful completion of our \$340m equity raising, the Bank’s Tier 1 capital position is now one of the strongest of Australian banks. This new capital will allow BOQ to take advantage of emerging growth opportunities and to support BOQ’s unique Owner-Managed Branch™ network in pursuing its natural growth potential.

Furthermore, in a clear reinforcement of our credit standing in the debt markets, the Bank's Government guaranteed bond issue launched in early July was three times oversubscribed and raised \$750 million.

As a result of these various equity and debt raising initiatives, the Bank has exceptionally strong capital and liquidity positions which will enable us to fully capitalise on growth opportunities we expect to progressively unfold throughout the current financial year and beyond.

I must thank your Board for the valued strategic input and sage advice collectively made to the Bank's successful result. In addition to guiding the Bank through this challenging time, your Board has also undertaken a comprehensive review to improve the Bank's Corporate Governance policies to ensure continued best practice in governing our bank.

Our Managing Director David Liddy must also be congratulated on his appointment as Deputy Chair of the Australian Bankers' Association (ABA). Given the key role played by the ABA in the regulation of a stable Australian banking system, his appointment to this influential position reflects Mr Liddy's standing and respect within the domestic banking sector.

On behalf of the Board, I thank all shareholders for their loyalty and support over the past year and going forward.

At the start of the new financial year there were emerging signs of a more buoyant Australian economic outlook, with both household spending and business investment gaining traction. In early September the Reserve Bank of Australia noted that domestic economic conditions had not only been stronger than expected, but that sentiment in global financial markets had also continued to improve.

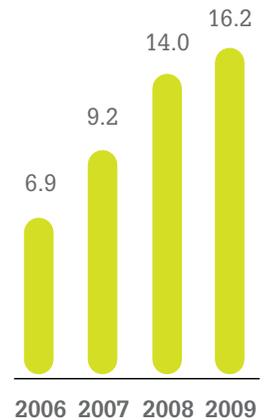

The RBA's synopsis indicates that there should be more conducive trading conditions for the Bank in 2010 than the past 12 months and we believe this, combined with the sustainable lower cost base now in place as a result of the successfully completed Project Pathways, can be leveraged to grow shareholder wealth in the year ahead.

FY 2009 g g i n n i n

Bank of Queensland emerged at the end of the 2009 financial year a leaner, more robust bank with a platform ready to strategically drive our continued growth forward.

The Bank has continued to grow despite the challenging economic environment and has again recorded a strong profit. Stringent asset quality surveillance and targeted cost savings combined to underpin the Bank's normalised cash net profit after tax of \$187.4 million, a 21% increase over the prior year.

Not only did we achieve our earnings forecasts, but also again outpaced the vast majority of our competitors in loan growth. Increasing retail deposits was particularly important during the first half of the year under review as higher costs of funding led to banks vying for alternative funding sources.

As a result aggressive sector-wide competition for deposits intensified during the year. At BOQ, the productivity and flexibility of our unique Owner-Managed Branch model ensured we were

able to quickly and efficiently realign the Bank's operational focus to driving deposit growth. With Owner-Managers directly incentivised, the Bank's retail deposits increased 16% from the previous record year.

Also contributing to the strong retail deposit growth achieved was an enhanced product offering. In 2009 CANSTAR CANNEX rated Bank of Queensland as providing the best value nationally for savings accounts - with our Online Savings, Cash Management and Term Deposit products all rated as offering outstanding value for customers.

In the second half of the year we focused on margin improvement in our deposit book, which stifled further growth somewhat but overall put us in a relatively strong position.

The Bank's positive result is also due to our highly disciplined focus on maintaining strong asset quality. As at 31 August 2009, unlike our competitors with large exposures, Bank of Queensland had only 67 exposures over \$10

million, reinforcing that we are essentially a domestic retail bank focused on low risk housing and small commercial lending.

In Australia we have seen many companies struggling in the past year, increasing bad debts for banks. Bank of Queensland has faced a moderate increase in bad debts as was expected with the downturn in the economy, but this is well below those incumbent on the major Australian banks.

Despite the challenging economic environment the Bank started the new financial year more strongly placed than ever to capitalise on future growth opportunities, largely due to Project Pathways.

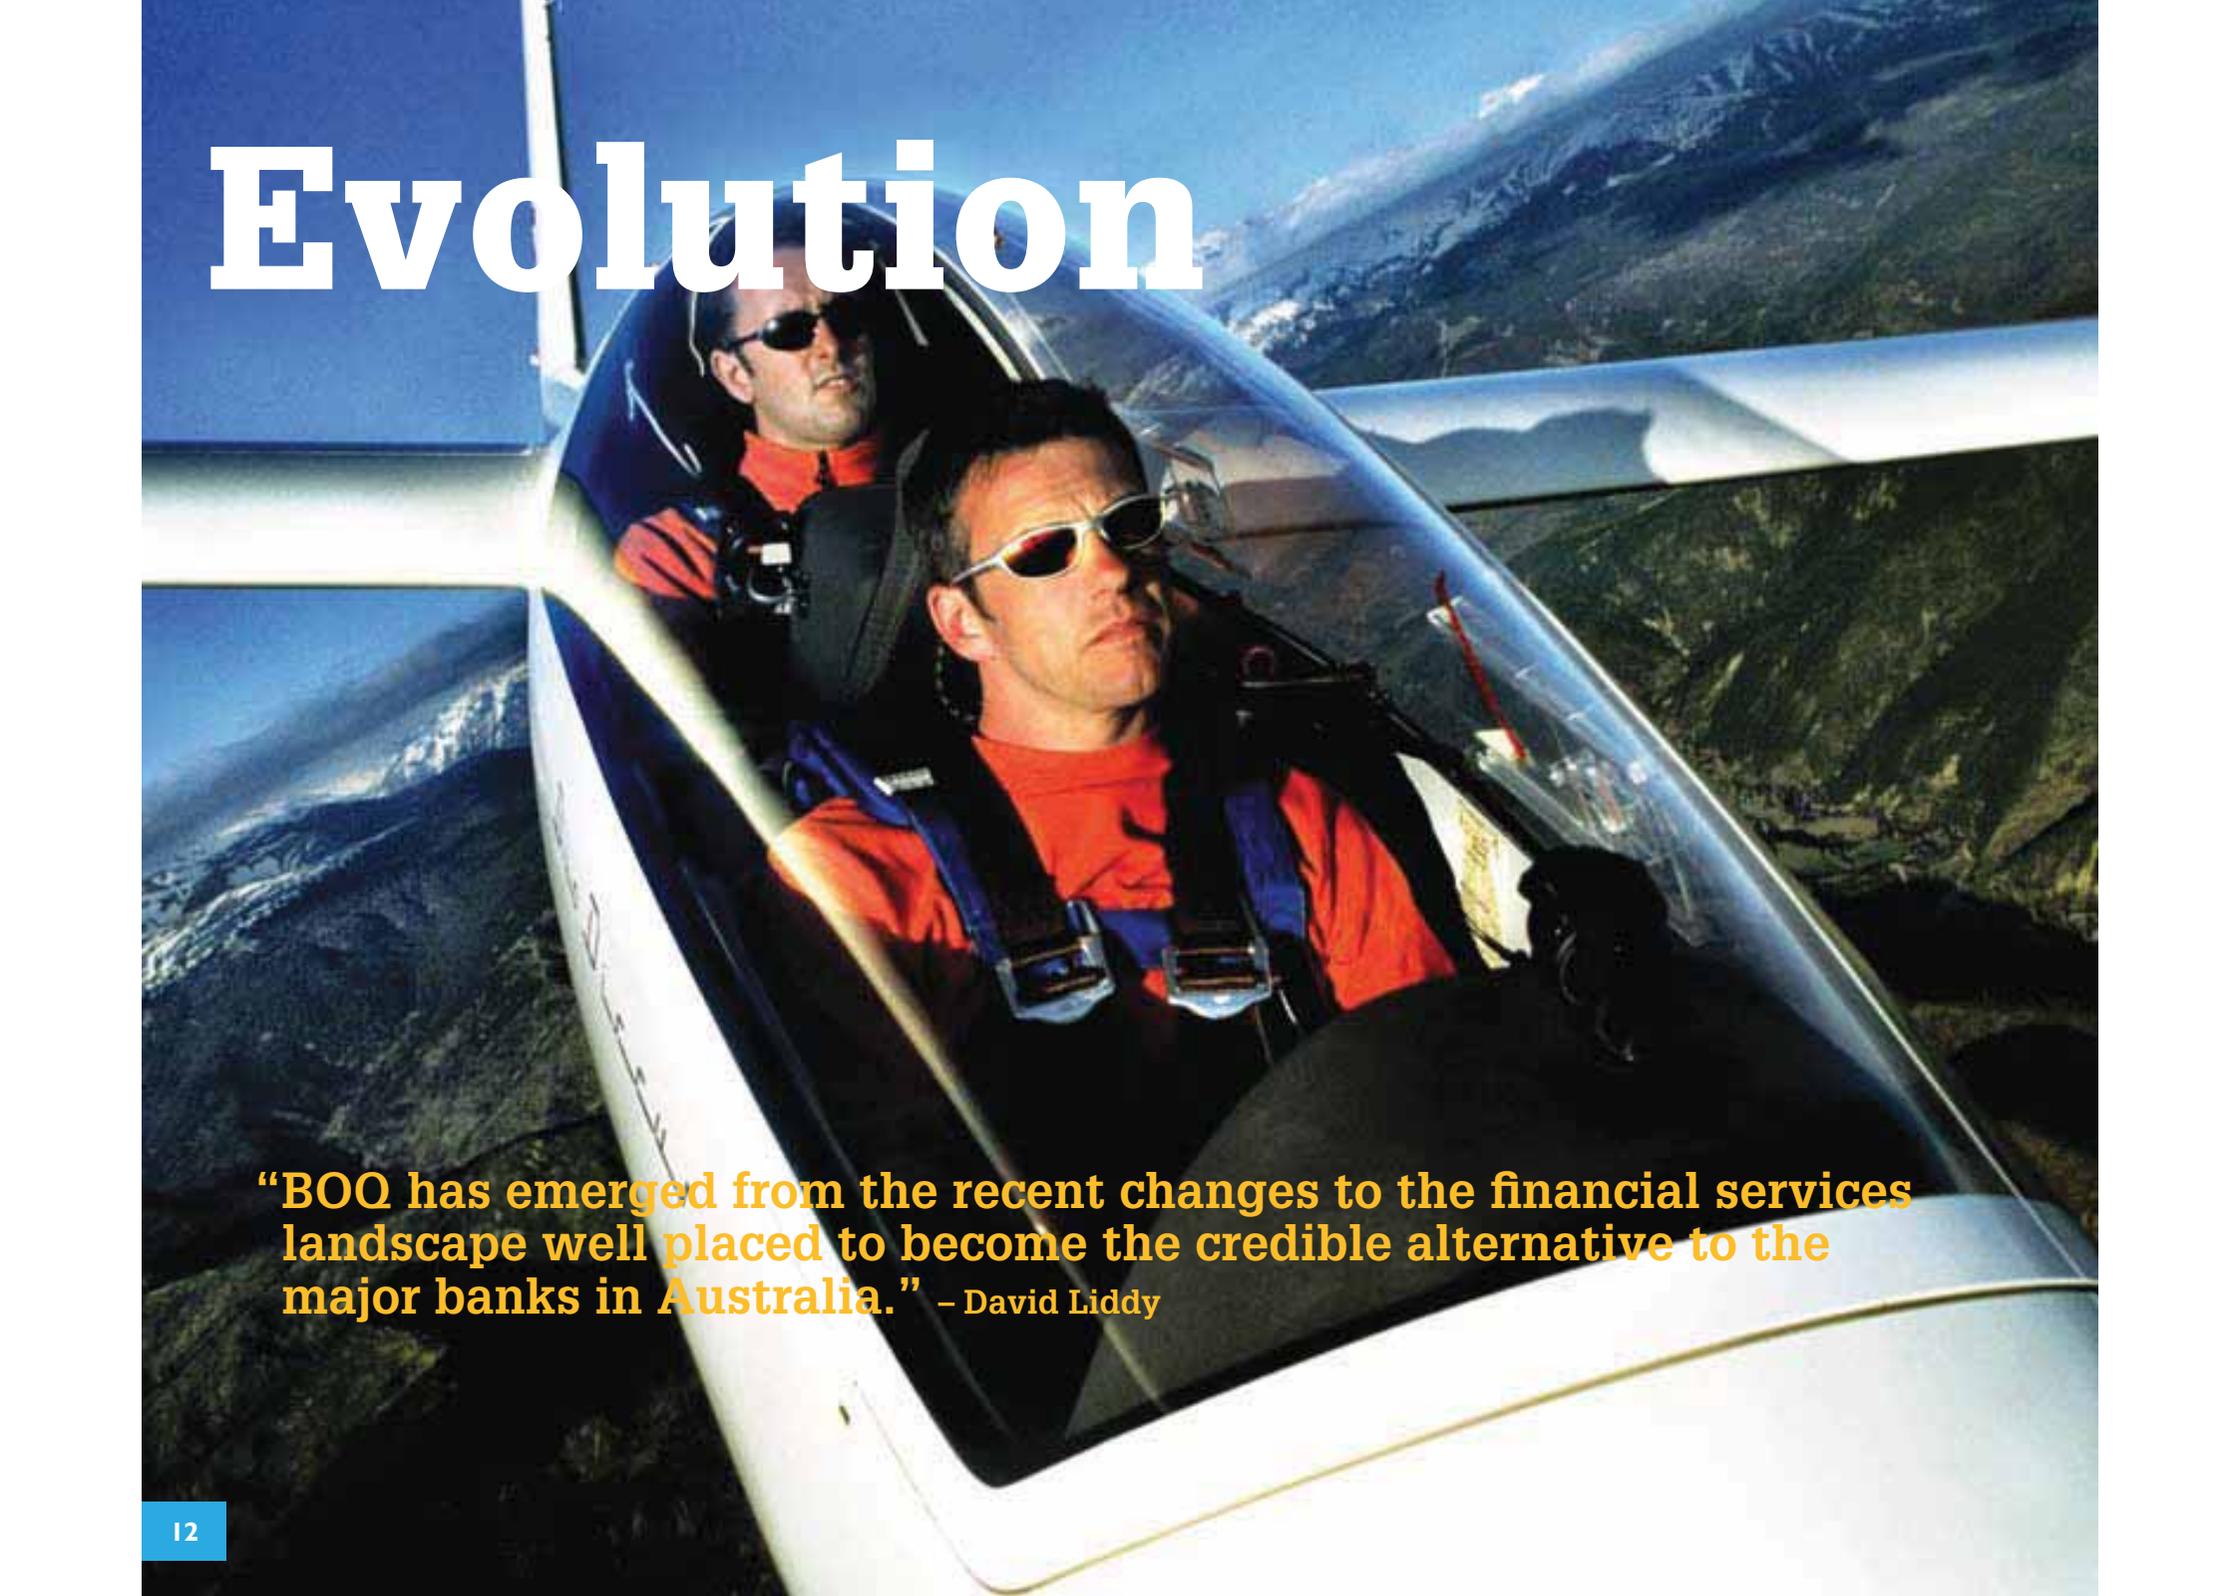

Project Pathways represents one of the most significant strategic initiatives undertaken by the Bank for many years. Comprising three core streams - efficiency, portfolio optimisation and strategic partnerships, Pathways was implemented to take advantage of opportunities arising out of the financial crisis, to counter the negative effects of the economic

downturn and to lay a foundation for our forward growth.

As part of the efficiency stream of Pathways, a cross sectional team of BOQ senior staff examined every aspect of our expenditure in order to effectively target \$50 million in annualised cost savings opportunities. One of the main initiatives of the team and the Portfolio Optimisation Program was to streamline costs and synergies of the Retail and Business Financial Services channels. As a result, these channels were merged into a single Banking division.

One of the most positive outcomes of the efficiency stream of Pathways is the Bank's reduction in the cost-to-income ratio. The cost disciplines we have put in place combined with our expanding revenue base have seen our normalised cash cost-to-income ratio decrease to 49.9% in FY 2009, a 6.2% decrease from the previous year. This is a long way from the 76% cash cost-to-income ratio the Bank had back in 2001, the year I joined BOQ.

Evolution

“BOQ has emerged from the recent changes to the financial services landscape well placed to become the credible alternative to the major banks in Australia.” – David Liddy

By September 2009 we had successfully completed Project Pathways with the efficiency program executed, the portfolio optimisation strategy underway and we had completed an additional equity raising to further bolster our already strong balance sheet.

The retail and institutional equity raisings completed in September 2009 were heavily subscribed, raising \$340 million and contributing to the highest capital position held in the 135 year history of the Bank. Our high capital ratio of 12.2% (Tier One 9.6%) at the writing of this report, is one of the strongest of all Australian banks, and well in excess of both APRA requirements and our own internal benchmarks.

We did look at possible merger and acquisition activity as part of the strategic partnership arm of Project Pathways and received interest from a number of parties looking to gain a strategic relationship with the Bank. However, in the context of preserving the value creation from the Pathways

internal initiatives for our existing shareholders, our long term ambitions as an independent bank, and the improving equity markets, we decided to pursue the capital raising rather than choose a strategic partner.

In other initiatives designed to optimise the performance of our sector leading distribution channel, we have now converted 39 corporate branches to higher-yielding Owner-Managed Branches and the under-performing New South Wales branches have now been consolidated to improve the overall performance of the region.

Interstate expansion of our Owner-Managed Branches will continue and this expansion, combined with our acquisition of Western Australia's Home Building Society in December 2007, is diminishing BOQ's traditional geographic concentration in Queensland. This reduces the Bank's geographic risk and provides a nationwide base to further grow our brand.

The Bank has continued its corporate social responsibility strategy which is the process that ensures all stakeholders of the Bank – including shareholders, customers, employees, the environment and community – all collectively benefit as the Bank grows.

As part of our commitment to shareholders we are focused on maximising shareholder value. To do this we will continue to focus on optimising the Bank's portfolio through enhancing our direct channels, using the power of our OMB network to grow deposits and increasing revenue from the SME market through cross selling and enhanced product offerings.

With the Australian public continuing to widely demand a credible, customer-centric alternative to the major banks, our unique OMB channel and the unprecedented strength of our financial position clearly present a major opportunity for us in the immediate future to bridge the void in the banking market following the takeovers of St George and Bank West.

We intend to harness this opportunity so that we can continue to be a rewarding investment for shareholders.

Outlook

- > The OMB network is proving its resilience and productivity in the toughest of conditions.
- > We expect to continue to grow profitably all aspects of our business ahead of our competitors while maintaining pricing and credit disciplines.
- > We have executed a series of efficiency initiatives that give us line of sight to achieving a cost-to-income ratio that challenges the major banks even at a fraction of their size and without the benefit or risk of corporate lending.
- > Bad debts are tracking upwards along with the economic downturn but are likely to remain below banking peers.
- > Management is expecting a gradual net interest margin improvement in the 2010 financial year.
- > A dividend payout ratio of 50 to 60% is expected to remain while challenging market conditions continue and pending resolution of our strategic ambitions.
