

# APRA BASEL III PILLAR 3 DISCLOSURES

Quarter ended 29 February 2020

# BANK OF QUEENSLAND LIMITED, BASEL III PILLAR 3 DISCLOSURES

For the Quarter Ended 29 February 2020

## 8 April 2020

This report has been prepared by Bank of Queensland Limited (**Bank** or **BOQ**) to meet its disclosure requirements under the Australian Prudential Regulation Authority's (**APRA**) Prudential Standard *APS 330: Public Disclosure*. It has been prepared using 29 February 2020 data.

## Key points

The Bank's capital management strategy aims to ensure adequate capital levels are maintained to protect deposit holders. The Bank's capital is measured and managed in line with Prudential Standards issued by APRA. The capital management plan is updated annually and submitted to the Board for approval. The approval process is designed to ensure the plan is consistent with the overall business plan and for managing capital levels on an ongoing basis.

The Board has set the Common Equity Tier 1 Capital target range to be between 9.0% and 9.5% and the Total Capital range to be between 11.75% and 13.5%.

As at 29 February 2020:

- Common Equity Tier 1 Capital Ratio was 9.9% (9.5% as at 30 November 2019); and
- Total Capital Ratio was 13.2% (12.8% as at 30 November 2019).

For the Quarter Ended 29 February 2020

## Table 20: Liquidity Coverage Ratio

APRA requires authorised deposit-taking institutions (**ADI**) to maintain a minimum 100 per cent Liquidity Coverage Ratio (**LCR**). The LCR requires an ADI to hold sufficient High Quality Liquid Assets (**HQLA1**) and alternative liquid assets (covered by the Committed Liquidity Facility (**CLF**)) to meet net cash outflows over a 30 day period, under a regulator defined liquidity stress scenario. BOQ manages its LCR on a daily basis with a buffer above the regulatory minimum in line with the BOQ prescribed risk appetite and management ranges.

BOQ maintains a portfolio of high quality, diversified liquid assets to facilitate balance sheet liquidity and meet internal and regulatory requirements. Liquid assets comprise of HQLA1 (cash, Australian Semi-Government and Commonwealth Government securities) and alternative liquid assets covered by the CLF from the Reserve Bank of Australia (**RBA**). Assets eligible for the CLF include senior unsecured bank debt, covered bonds, asset backed securities, residential mortgage backed securities (**RMBS**) and internal RMBS that are eligible for repurchase with the RBA. BOQ has a stable, diversified and resilient deposit and funding base that mitigates the chance of a liquidity stress event across various funding market conditions. BOQ uses a range of funding instruments including customer deposits, short term and long term wholesale debt instruments, securitisation and covered bonds, with the objective of lengthening tenor, diversifying funding sources and increasing the stable funding base.

BOQ's average LCR over the February quarter was 135%, which is in line with the previous November 2019 quarter average of 135%. Net Cash Outflows (**NCO**) were down slightly from the previous quarter due to low run-off retail deposits replacing relatively higher run-off unsecured wholesale deposits. Liquid assets were lower over the same period as a result of decreased HQLA. The following table presents detailed information on the average LCR composition for the two quarters. 91 data points were used in calculating the average figures for the February 2020 quarter and 91 data points were used in calculating the average figures for the November 2019 quarter.

For the Quarter Ended 29 February 2020

## Table 21: Net Stable Funding Ratio

APRA's objective in implementing the Net Stable Funding Ratio (**NSFR**) is to strengthen funding and liquidity resilience. The NSFR encourages ADIs to reduce the amount of liquidity transformation by funding their lending activities with more stable sources of funding, and thereby promoting greater balance sheet resilience.

The NSFR establishes a minimum stable funding requirement based on the liquidity characteristics of the ADI's assets and off-balance sheet activities over a one year time horizon. The NSFR is defined as the ratio of the amount of Available Stable Funding to the amount of Required Stable Funding. APRA requires ADIs to maintain an NSFR of at least 100%. BOQ manages its NSFR on a daily basis and actively maintains a buffer above the regulatory minimum in line with BOQ's prescribed risk appetite and management ranges.

BOQ's NSFR at 29 February 2020 was 112%, flat from 112% at 30 November 2019. The composition of the balance sheet was broadly in line across the two periods.
